SwissDevJobs.ch

SWISSDEV JOBS STORY

We are Software Engineers and built SwissDevJobs.ch in 2018 because we have been frustrated with existing job boards. (you all know the big, general job sites)

We created a job platform that we would love to use, where transparency is the core value.

On SwissDev Jobs each job offer has:
- Salary brackets
- Tech stack and development methodologies
- Clear and standard format

And each one is placed on a cool map!

WHY US AND NOT OTHER JOB BOARDS?

01
We are the first Swiss job board dedicated exactly to Software Engineers and IT people

02
Loved by users – Developers really enjoy using our platform and come back

03
Quick and effective – most of our clients find suitable candidates and fill the position within 40 days

04
Constantly growing and gaining popularity among Swiss developers (we doubled our user base in the last 12 months)

05
Good invested money – we offer affordable packages for your company size

CLIENTS ABOUT US

"Good developers are difficult to find. We always advertise our vacancies here and were able to reach the people we needed. That's why we really appreciate SwissDev Jobs. We've also hired people in the past who applied through SwissDev Jobs and our experience is consistently positive. Thank you for the great support!"

Sarah Häuptli - Office Manager, Smartfactory GmbH

"Wir konnten über Swiss Dev Jobs gerade jemanden finden und haben auch weitere spannende Kandidaten über die Seite kennengelernt. Wir fanden swissdevjobs mit Abstand die beste Adresse um Entwickler zu finden."

Flurion Conradin - Software Engineer, Liris Tech SA

"We are big fans of this job board!! It can be tricky to find good developers, but thanks to this job board we get amazing profiles of developers on a regular basis. I wish there were more job boards like this one but with other industries. Keep on the good work!!"

Alexandra Junker - Talent Acquisition Specialist, Antaes Consulting

DEVELOPERS ABOUT US

Really long time I didn't search any job , but i loved that page and i saw that so usefully, and i loved mostly salary brackets :).
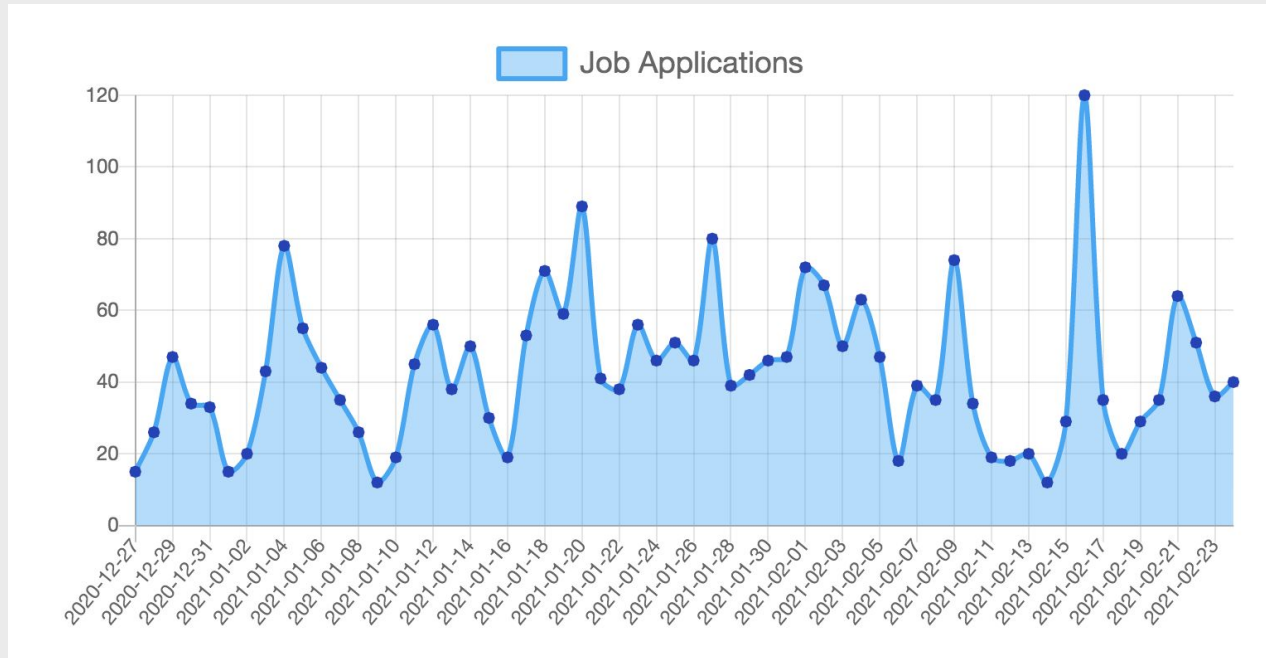

The job board you have built it's quite nice indeed. I like that's it's very easy to filter out jobs based on my skillset.

I had only a very short time to look at the website. I find Transparency generally very helpful. I like the fact, that the needed Technologies and methodologies are listed and that the possible salaries also are given. The map on the right hand side is also very much useful for someone looking for a job (because even in countries like Switzerland, very good public transportation: commuting to the workplace on an everyday basis, can be sometimes problematic. So that's all this time.
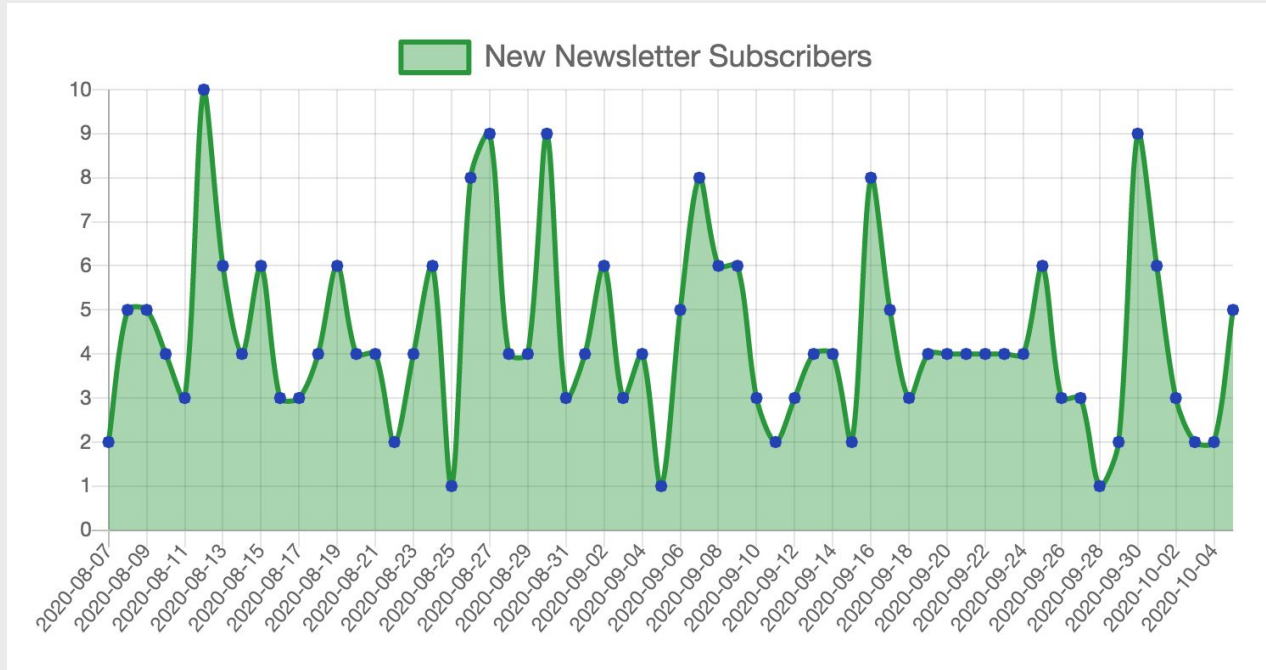

Over 21200 job applications since 2019

- Unlimited number of job postings
- **Transparent Company Profile** on swissdevjobs.ch/companies
- Dedicated Social Media campaign about your company

* Ask our representative for the price

TRANSPARENT COMPANY PROFILE

We interviewed over 300 Software Engineers, asking:
"What information do you need to know about a company when applying for a job?"

With their answers we came up with a Transparent Company Profile format with all important points.

The Profiles are very popular among our visitors and help you build a complete picture and tell your story to the candidates.
